County of San Diego

AIR POLLUTION CONTROL DISTRICT

The County of San Diego Air Pollution Control District (APCD) has helped fleets of all sizes in San Diego County get cleaner engines, newer trucks, and retrofit technologies to reduce diesel emissions. Businesses have benefitted from financial assistance to modernize their fleets while reducing diesel emissions before regulations require them to do so on their own.

Some of the projects that may qualify:

- √ Diesel Particulate Filters (DPF)
- √ Engine Repowers
- √ Truck Replacements

APCD has provided millions in grant funding for clean heavy-duty truck projects. Don't miss your opportunity to get funding to use toward a cleaner truck. You don't have to do it on your own, let us help!

Give us a call and one of our grants and incentives specialists will help you figure out how you may be able to get funding through one of our programs.

Add your email to our Grants and Incentives list serve to receive information about funding opportunities as they become available!
