Transportation Electrification Advisory Services (TEAS)

Program Overview

A new kind of utility offering: Comprehensive electrification Advisory Services for medium- and heavy-duty fleets

Approved by the Commission November 30, 2023

- 3-year implementation timeline
- \$17.8 million program

Complimentary advisory support for fleet customers tailored to meet their needs in whatever phase of electrification they are in, regardless of their eligibility for other SDG&E programs.

Open to all customers with 50% of program budget focused on supporting Underserved Communities with prioritized Advisory Services for these customers. Outreach led by Community-Based Organizations (CBOs).

Transportation Electrification Advisory Services (TEAS)

Who is a TEAS Customer?

Medium & Heavy-Duty Fleets with a facility in SDG&E's service area

Fleets at **every stage** of their electrification journey—from initial planning to post-energization— can benefit from TEAS

Priority Customer Segments Include:

- Small Businesses
- Schools
- Tribes
- Transit Agencies
- Municipalities

Transportation Electrification Advisory Services (TEAS)

What are the TEAS Advisory Services?

TEAS Advisory Services are divided in four “stages” of support:

SDG&E TEAS Advisory Services

Fleet Electrification Planning

Support navigating where to start with vehicle selection, charging infrastructure options, and load planning.

Pre-Energization Support

Guidance on infrastructure capacity and providing liaison within SDG&E departments.

Post-Energization Support

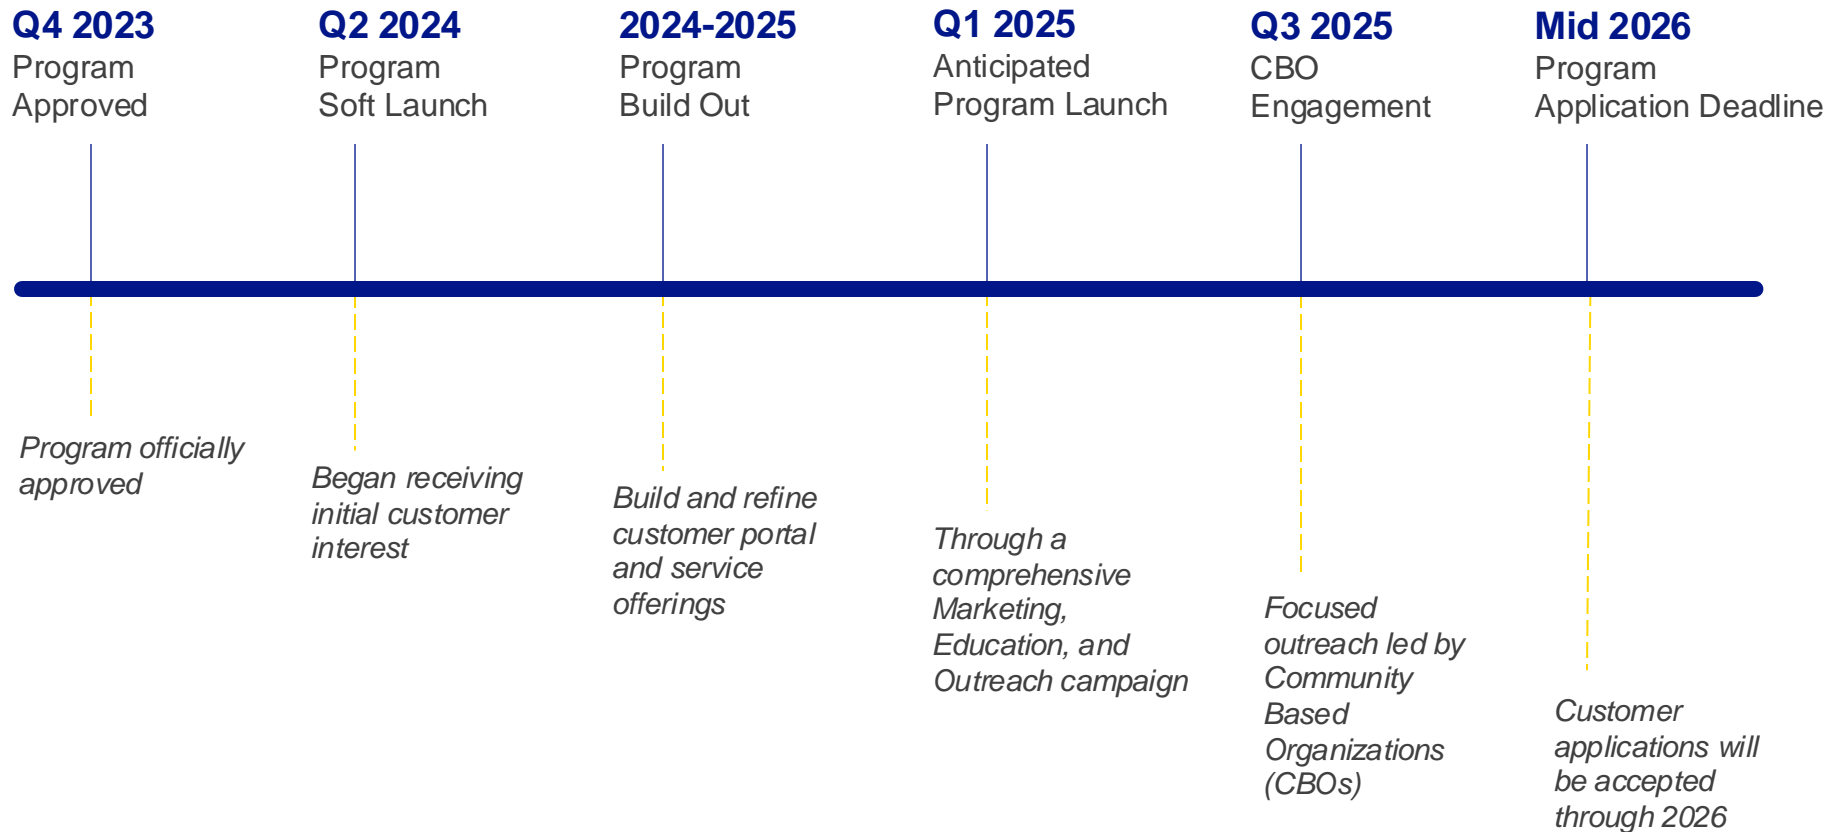

Assistance to effectively manage energy consumption, maintain infrastructure, and optimize rates.

Emerging Technology Consulting

Help integrating innovative solutions including Automated Load Management (ALM) and V2X (Vehicle-to-Everything) technologies.
