Resources

- [Alternative Fuels Data Center](#): Fleet-focused tools and information covering vehicles and fuels, fueling stations, ownership costs, laws, incentives, and funding opportunities.
 - Of particular interest is **AFLEET**, which can help fleets compare the costs, emissions, and petroleum use associated with conventional and alternative-fuel vehicles and technologies.
- [Clean Cities and Communities Technical Assistance](#): Access to objective information, technical experts, the Technical Response Service, Tiger Teams, and educational toolkits.
 - In particular, the **Technical Response Service** allows stakeholders to submit questions and receive assistance from technical experts on alternative fuels, vehicles, infrastructure, and related transportation topics.
- [Joint Office of Energy and Transportation](#): Technical assistance, funding information, and resources for charging and alternative-fueling infrastructure planning and deployment.
- [Argonne National Laboratory](#) fuel-cost calculator.
