# Clean Transportation Fleet Programs

## TEAS Electrification Support

**No-cost technical guidance to help fleets plan and deploy EV charging infrastructure.**

**Supports fleets with:**

- Site planning & load forecasting
- Pricing plan selection & optimization
- Guidance on emerging tech

# Transportation Electrification Advisory Services (TEAS) Program

## Fleet Electrification Planning

- Project Planning
- Available Vehicle Options
- Charger Selection
- Pricing Plan Education
- External Funding Information
- Total Cost Analysis
- Estimated Environmental Benefits + Emission Reduction Comprehension

## Pre-Energization Support

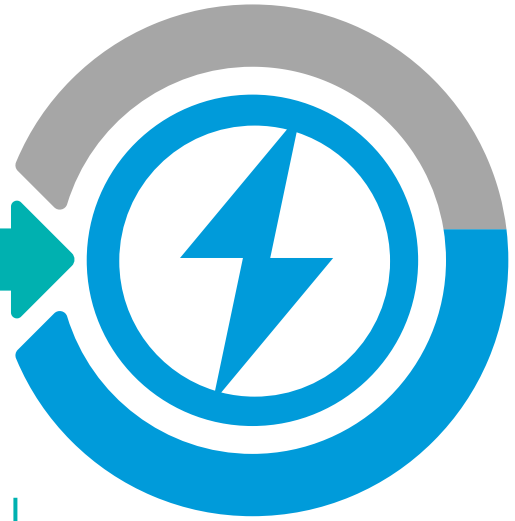

- SDG&E Liaison Services
- Provider Selection Support
- Capacity Analysis
- Site & Load Planning

## Post-Energization Support

- Pricing Plan Optimization & Load Management
- Emergency Preparedness for EV Fleets
- Training for Operations and Technology Maintenance

## Utilizing Emerging Technology

- Vehicle-Grid Integration (VGI)
- Automated Load Management (ALM) Options
- Microgrids
- Distributed Energy Resources (DERs)
- Temporary & Mobile Charging EV Solutions

# Transportation Electrification Advisory Services (TEAS) Program

**Ready to Get Started?**

*Submit an interest form by November 30th SDGE.com/TEAS*

# Keep the Conversation Going

Focus on energy planning before key decisions are finalized

**OPPORTUNITY**
Share your business objective

**LOCATION**
Identify location or service area

**LOAD + TIMING**
Provide preliminary assumptions

**NEXT STEPS**
Determine the utility path forward
